GOING IN CIRCLES MEANS LEADING THE WAY

A sustainable bioeconomy will use organic waste as a resource.

At **4th Biobased Economy Conference** we want to discuss circular business models, connect participants from different sectors and regions and initiate ideas for new waste-based value chains.

Example sessions

- Circular and biobased: feasible and bankable? **Keynotes**
- Policies, potential and perseverance: what does it take to walk the circular path? **Panel debate**
- Meet the right people for your biobased project: **virtual B2B meetings**
- Biobased and circular at its best - check out how others do it!

Sounds good?
