

Webinar on Funding for Energy Efficiency and Sustainable Transport Projects – ELENA

The funding programme ELENA is the right opportunity for you if you are a public or private entity pursuing an energy efficiency or sustainable transport project.

03-06-2020, 10:00-11:00 in Bern

Registration fee: free

This event provides information about the funding programme “European Local Energy Assistance” (ELENA).

ELENA provides grants for implementation projects focused of energy efficiency, renewable energy or sustainable transport.

ELENA supports projects above €30 million with 3-4 year implementation period. The grant covers up to 90% of technical assistance/project development costs. For example, the grants can be used for feasibility and market studies, programme structuring, business plans, energy audits and financial structuring.

This webinar provides you with basic information about ELENA, eligibility criteria and the submission process.
